PAPER PRODUCTS

## Dear Reader,

You are now holding the latest TMH Solutions product catalogue in your hands – filled with innovations, and tried and tested solutions around your cleaning process. Since the Covid 19 pandemic arrived on our shores, we`ve all personally experienced a dramatic change to our lives and livelihood. Further challenges lie ahead for us all, as we hope to get back to some form of normality, and you may be looking for the most effective hygiene products, to keep you, with staff & pupils safe.

With that in mind, TMH Solutions want to be there every step of the way to support you and your facility. We have experts available to answer any questions you might have around cleaning and cleaning products.

The result is better cleaning practices, more hygienic spaces, lower rates of infection and an overall improved environment – just how your facility should be.

That`s serious cleaning know-how from TMH Solutions.

What Makes us  
**Different**

## How microfibre cloths can make cleaning easier.

**Learn how to quickly and effectively use microfibre cloths with less water and without chemicals.**

### Use dry or damp

When dusting, the split fibres create static, which attracts dust leaving a smear-free finish.

Wet with water and ring out thoroughly. The fibre's capillary action helps scrape the surface, lifting and capturing dirt and bacteria.

### Important tips about microfibre cleaning

Microfibre technology is advancing to meet the demands of today's cleaning industry and the needs of end users – and in many ways surpassing the performance of traditional cleaning.

Microfibre does a fantastic job at effectively removing dirt and grease from a myriad of surfaces. However, there is still some confusion as to the exact capabilities of the fibre and how best to capitalise on its many uses.

Microfibre cloths have a completely different structure to classic woven cloths. They are made from split synthetic fibres, which are much finer than other textiles so have more fibres per cloth. In addition, the individual microfibrils are engineered to create a very large surface area per fibre and are naturally statically charged so that they have a strong suction effect. In other words, they collect as much dirt as possible in just one wipe, even from the smallest surface crevices.

Trials carried out have indicated that microfibre woven cloths consistently outperform traditional cloths in terms of their ability to remove dirt, grease and bacteria from a variety of surfaces, making them an excellent product for both commercial and domestic cleaning.

### Top tips when considering microfibre products

- They are low linting and short pile cloths leaving no 'fluffy' deposits so work well on high gloss surfaces such as metal and mirrors.
- Microfibre requires less water and chemicals making it cost-effective and beneficial to the environment.
- It absorbs seven times its own weight in liquid.
- They are easy to clean, quick to dry and can be washed many times over.
- Though microfibre doesn't kill bacteria, it effectively lifts and removes 99.9% of anything that is on a surface.
- Not all microfibre products are the same so make sure you are purchasing the right cloth for your cleaning needs. Our products have been independently tested to prove the efficacy of bacterial lift and wash durability.

#### How to use

1. Fold in half.

2. Fold again to make eight sides, or again for smaller surfaces to sixteen sides.

3. Place the cloth flat on the surface and apply pressure, then wipe to clean. Use a different side for different surfaces.

CLOECO4905L

Safe for use on surfaces made from stainless steel, porcelain and GRP.

**GREEN'R WC FRESH ECOLOGICAL TOILET CLEANER 1L**

**SKU**  
CLOECO550

## Environmental advantages:

- Detergents must break down into harmless substances once they enter the environment.
- The products must come in a minimal amount of packaging, thus taking up less space in the landfill.
- Detergents must come with guidelines for safe handling and use.
- Recommendations on the label instruct the consumer about how to use the correct amount of detergent for the job in hand.
- All-purpose cleaners must have instructions for diluting the detergent effectively to clean practically any washable surface.

## ENVIROMENTAL CLEANING

Removes soiling and water scale from water washable hard surfaces, including stainless steel, porcelain, ceramic & glass.

CLOECO473

## PRODUCT GUIDE

Cleaning products all contain cleaning agents that help to strip away grime. After being flushed down the drain, many detergents cause undue harm to nature. By contrast, cleaning products with the European Eco-label do the same job while causing minimal environmental harm.

By following the European Eco-label flower, you get products that tread gently on the environment throughout their life cycle, from the creation of the chemicals themselves, to their packaging, to their disposal.

# TRECOS

## ECOLOGICAL STANDARD

from **TMH**  
Solutions  
system hygiene specialists

### What is the TRECOS?

TRECOS - is the new ecological standard pioneered by TMH Solutions to clarify a products green credentials, and we have awarded it to a specially selected range of existing products which attain excellent environmental performance.

These products will now carry the TRECOS logo, which covers all aspects of a products environmental profile, including transport impact, biodegradability, packaging, energy etc.

Products are awarded the TRECOS mark if they obtain a low product category score according to the TRECOS Ten Rules of environmental impact. Products with the TRECOS mark reduce the impact of the cleaning process on the environment.

TRECOS accreditation is based on ten factors TMH Solutions believes are fundamental to the evaluation of the ecological and environmental impact of products in the cleaning industry.

## TRECOS Ten Factors

TRECOS accreditation is based on ten rules TMH Solutions believes are fundamental to the evaluation of the ecological and environmental impact of products in the cleaning industry. The impact on the environment is calculated based on the following 10 factors:

- Raw materials - Raw materials used are scored for impact, the higher the impact the higher the score.
- Packaging Ratio - Products are scored for their packaging ratio, the more packaging for each litre of solution, the higher the score.
- Environmental Hazard Classification - Raw materials are scored according to their environmental classification. H400, H410, H411, H412 and H413. The higher the impact the higher the score.
- Volatile Organic Compound content - The higher the level of V.O.Cs the higher the score.
- Energy - The energy used to obtain the finished product is taken into account. The more energy used the higher the score.
- Health and/or Physico - chemical properties. The product is evaluated for potential adverse health effects and adverse physico/chemical properties. The more adverse the properties the higher the score.
- Consumer Use - How often the product is used and the control over its use are scored. The higher score is given to products used in an uncontrolled fashion daily.
- Biocidal Products - Biocidal products are scored depending upon whether they have a necessary function to protect public hygiene and the registration of the active ingredients in Europe. A high score is given to products that do not have a necessary function to protect public hygiene.
- Clear Labelling - A high score is given to those products without clear user instructions.
- Biodegradation - The manufacturing process produces waste which is controlled and disposed of in a responsible fashion. This is scored according to the environmental impact of each products waste.

# Energy Saving Systems

## Water Saving

Incredible cleaning power means you could reduce your water usage by up to 25% per wash.

## Time Saving

Cycle times are reduced as the water used during the wash is not heated.

## Energy Saving

By washing at 30°C rather than 60°C, a saving of around 65% (cold fill) or 70% (hot fill) is achieved in energy costs.

## Automatic Dosing System (ADS) For Laundry Liquids.

The ADS is an automatic dosing system that feeds liquid laundry chemicals from the drums via a wall mounted pump feeding directly into the laundry machine at the correct point of the wash/rinse cycle. It ensures the correct dosage for any chemical to be dispensed for any given stage within the wash process.

### Service Support

We provide the Service Support to install, commission and calibrate auto dosing equipment. We also provide regular service check-ups.

## WE PROVIDE

## COMPLETE OPL LAUNDRY RANGE

### Introducing... OPL Laundry System

#### L1 DETERGENT

A fully built, biodegradable laundry detergent. Removes tough stains, brightens textiles, low foaming. This intelligent detergent is part of a low temperature stain removal system. The detergent activates the stain remover with water temperature as low as 15°C.

#### L2 DESTAINER

This innovative Laundry Destainer is activated above 15°C by L1 Detergent, gives excellent stain removal and emulsifying qualities at low temperature, designed for auto dose only.

Effective at Low Temperatures

Tough on Stains

Colour Safe

Gentle Formulation

Biodegradable

Cost Effective

Works in all Water conditions

**PRO MAX L1A**

Fully Built Premium OPL Biological Laundry Detergent

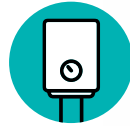

SKU	PACK SIZE
CHL1A	20L

**PRO MAX L2A LOW TEMP LAUNDRY DESTAINER**

Colour safe & effective at removing stains at temperatures as low as 20c

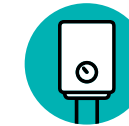

SKU	PACK SIZE
CHL2A10L	10L

**PRO MAX CHL2D HYPO LAUNDRY DESTAINER 20L**

A liquid Chlorinated destaining additive for use on heavily stained fabrics. Add to the sluice wash phase for enhanced cleaning results

SKU	PACK SIZE

BRING YOUR VISITOR EXPERIENCE TO LIFE WITH A SCENT THAT SPEAKS SOPHISTICATED LUXURY

# The Luxury of Fragrance

From the light floral fragrance of a newly tied bouquet, rich romantic musk, mouth-watering notes of chocolate and orange, to the sweet scent of newly baked cookies and everything in between.

Choose from our already existing banks of luxury fragrances or let us create a bespoke scent just for your brand, that will help you deliver an enhanced customer experience.

# CLEANING SCHEDULES

## What is a Cleaning Schedule?

Schedules highlight the product to be used for each cleaning task, the method of application and the frequency of use. When each task is completed, it is ticked off on the chart to provide a record for EHO inspections. Frequency of cleaning tasks are separated into the following categories:

**Daily Cleaning:** Cleaning tasks that are the absolute minimum that must be done on a daily basis to keep hygienic conditions.

**Weekly Cleaning:** Although most of these tasks don't require daily work, they are still some of the most important tasks that need to be done in catering environments.

**Monthly Cleaning:** These are areas that can afford to be neglected during your daily and weekly cleaning sessions, but ultimately a good thorough monthly cleaning is needed.

## What are the benefits of a Cleaning Schedule?

- Helps to implement an effective cleaning regime.
- Simplifies the training of kitchen staff.
- Shows due diligence and awareness of HACCP.
- Ensures compliance to Food Safety standard BS EN 22000.

## Preparing a Cleaning Schedule

TMH Solutions supplies a survey form available for download from TMH Solutions website. From the completed survey form, technical advisors at TMH Solutions will work with distributors to draw up a cleaning schedule that is specific to your kitchen.

The form is titled 'CLEANING SCHEDULE' and includes the following sections:

- ESTABLISHMENT AREA:** A field for the name of the establishment.
- DATE WEEK:** A field for the start date of the week, with a callout 'Date Week Commencing' pointing to it.
- Templates:** A section for 'Templates' with a 'TEL:' field and a callout 'Customers Details' pointing to it.
- Main Table:** A table with columns for 'AREA TO BE CLEANED', 'PRODUCT TO USE', 'HOW TO USE', 'CLEANING FREQUENCY', and a weekly grid (MT, WT, FS, S). Callouts include 'Area to be cleaned' pointing to the first column, 'Product to use' pointing to the second column, 'Cleaning Instructions' pointing to the third column, and 'Cleaning frequency' pointing to the fourth column. A callout 'Operatives Signatures' points to the weekly grid.

At the bottom of the form, there is contact information: 'info@officestuff.ie', '0818 202 007', and 'Address: Unit 2 Billberry Business Park, Waterford, Eircode - X91 WY48'.
